

Management and Performance Indicators

The AQUA matrix modules provide operational indicators that can be consulted through parameters and time intervals.

Based on the web portal, the system also provides indicators that permit strategic management and utility performance measurement.

Main Features

Performance Indicators

- Query predefined reports and construct new ad-hoc reports;
- Extract data in accordance with user-defined variables;
- Export information to MS Excel, HTML, PDF and XML formats;
- Information about the utility performance for 11 operational areas, grouped together, allowing the rapid query and export of information for tactical and strategic analysis:
 - Contracts
 - Register
 - Readings
 - Meters
 - Services
 - Bills
 - Debt
 - Receipts
 - Supply processes
 - Complaints/Analysis of accounts
 - Consumption
